

YFS Vermeer Partners Growth Portfolio Fund

March 2024

Investment Objective

The objective of the YFS Vermeer Partners Growth Portfolio Fund is to provide capital growth for investors with a 5-year time horizon (net of fees).

Investment Policy

The fund is an actively managed, diversified portfolio of predominately global equities, but also some fixed interest and alternative investments (such as property and infrastructure) through both direct securities and collective funds. The portfolio will tend to hold between 60 and 80 investments at any one time.

Monthly Commentary

The Investment Association (IA) Flexible Investment Sector returned +1.70% over the month.

Markets shrugged off sticky inflation in the services sector. The most recent US CPI print showed that an important subset of prices – dubbed “supercore” – advanced by the most in nearly two years. It is also a signal that the “last mile” dynamics of the battle against inflation could well get more complicated in the months ahead, particularly as the services sector continues to be less sensitive to higher borrowing costs.

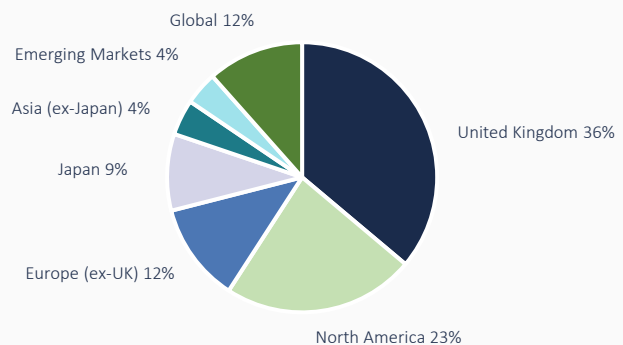

Nonetheless, quality compounders and technology-focused growth stocks continued to grind higher. If looking on a medium- or long-term view, these sorts of businesses trade on valuations that becomes less stretching due to their implicit growth prospects.

During the month we consolidated our fixed interest exposure into a more UK focused basket of government and high-grade corporate bonds and – at the margin – higher yielding specialist debt funds. While this fund sets out, first and foremost, to benefit from the long-term compounding effect that a balanced portfolio of global equities can bring, we look to retain some diversification through a modest exposure to bonds and selected alternatives.
