

YFS VERMEER PARTNERS PORTFOLIO FUND

December 2025

INVESTMENT OBJECTIVE

The objective of the YFS Vermeer Partners Portfolio Fund is to provide capital growth as well as generating an income for investors with a 5-year time horizon (net of fees).

INVESTMENT POLICY

The fund is an actively managed, diversified portfolio of predominately global equities, fixed interest and alternative investments (such as property and infrastructure) through both direct securities and collective funds. The portfolio will tend to hold between 60 and 80 investments at any one time.

MONTHLY COMMENTARY

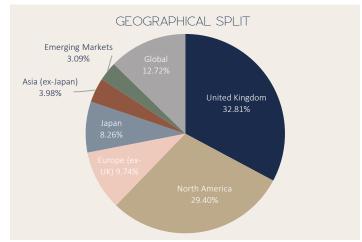

As the old saying goes, it was a month of two halves: global equities fell initially, before a sharp recovery meant that markets were broadly flat (although the S&P 500 eked out a seventh consecutive monthly gain). While the odds of a December Federal Reserve rate cut fell to around 25% midmonth, we closed the month with a cut all but certainly priced in and this boosted markets, Elsewhere, fears of an AI bubble continue to abound, with the Magnificent 7 losing ground for the first time since March. European assets also performed well as expectations rose about a potential peace deal in Ukraine. However, not every asset class managed to recover - Bitcoin saw its worst month since February.

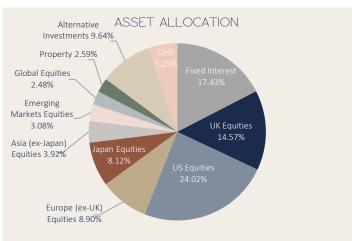

We initiated a new position in **Intercontinental Exchange** (ICE). We took profits in the holding in **Reckitt Benckiser**.

ICE operates exchanges (including NYSE) and clearing houses, it also provides pricing and reference data, indices, and analytical tools for fixed income markets, and, through its Black Knight acquisition in 2023, runs an end-to-end technology platform that digitises the entire US mortgage workflow, from loan origination (via the Encompass platform) through loan servicing and capital markets. The shares have de-rated recently along with many data centric companies thought to be more at risk from Al and the continued slow US mortgage market. The derating should provide some downside risk protection, especially in an improving rate environment which will help the mortgage and fixed income business while the energy trading business is best in class and continues to take market share. This is a good entry point to buy a high margin business, with strong regulatory moat and increasing recurring revenue.

^{*}Performance figures are calculated from the inception date of the fund, 16th October 2023.

The ARC Private Client Indices ("PCI") are a set of risk-based indices designed to be used by private clients and their advisers to compare the performance of their portfolio against. The PCI are peer group comparisons with real performance data compiled from over 70 private client investment managers, allowing performance to be assessed against a realistic and sizeable peer group. Given the time constraints involved with retrieving the performance numbers from each investment firm, the last three months of any period will often contain estimated data.
